Question 1
Correct
Marked out of 5.00
⚑ Flag question

In the following program, an array of integer data is to be initialized.
During the initialization, if a user enters a value other than an integer, it will throw an InputMismatchException exception.
On the occurrence of such an exception, your program should print "You entered bad data."
If there is no such exception it will print the total sum of the array.

/* Define try-catch block to save user input in the array "name"
   If there is an exception then catch the exception otherwise print the total sum of the array. */

Sample Input:

3
5 2 1

Sample Output:

8

Sample Input:

2

1 g

Sample Output:

You entered bad data.

For example:

Input	Result
3 5 2 1	8
2 1 g	You entered bad data.

Answer: (penalty regime: 0 %)

```java
1  import java.util.Scanner;
2  import java.util.InputMismatchException;
3   class prog {
4    public static void main(String[] args) {
5      Scanner sc = new Scanner(System.in);
6      int length = sc.nextInt();
7      // create an array to save user input
8      int[] name = new int[length];
9      int sum=0;//save the total sum of the array.

11     /* Define try-catch block to save user input in the array "name"

13     the total sum of the array. */
14     try
15     {

17             name[i]=sc.nextInt();
18             sum+=name[i];
19         }
20         System.out.println(sum);

Question 2

⚑ Flag question

Write a Java program to handle ArithmeticException and ArrayIndexOutOfBoundsException.

Create an array, read the input from the user, and store it in the array.

Divide the 0th index element by the 1st index element and store it.

if the 1st element is zero, it will throw an exception.

if you try to access an element beyond the array limit throws an exception.

Input:

5

10 0 20 30 40

Output:

java.lang.ArithmeticException: / by zero
I am always executed

Input:

3
10 20 30

Output
java.lang.ArrayIndexOutOfBoundsException: Index 3 out of bounds for length 3
I am always executed

For example:

Test	Input	Result
1	6 1 0 4 1 2 8	java.lang.ArithmeticException: / by zero I am always executed
